PROFESSIONAL SUMMARY

Independent full-stack developer with 4 years of experience building and deploying production-ready web applications. Specialized in clean UI/UX and AI-powered systems. Currently a high school student at Delhi Public School focusing on end-to-end product development.

EXPERIENCE

Participant - Alameda Hacks '26 | Jan 2026

- Developed "Dyne," a swipe-based restaurant discovery web application, within a 4-member team.
- Built responsive UI and core application screens using Next.js and Tailwind CSS under strict time constraints.

3rd Place Winner - Solaris Hackathon | Oct 2025

- Co-developed "MoonLink," a decentralized communication network for astronaut explorers.
- Designed and built the complete frontend with interactive, responsive components using HTML, CSS, and JS.
- Collaborated in a 3-member team to deliver a peer-to-peer system for real-time data sharing within 24 hours.
- Awarded 3rd place overall for technical execution and innovation.

Participant - Summer of Making'25 | Aug 2025 - Sep 2025

- Engineered a Pomodoro Focus App to help users manage time efficiently using vanilla JavaScript.
- Focused on clean UI/UX and smooth user interactions, earning 48 "shells" for project completion.

EDUCATION

Delhi Public School, India | Expected March 2028

- High School Diploma / Class X (CBSE)
